Our collection of thermofoils offers a vast array of possibilities for your decor. Many of the thermofoil patterns simulate real wood in its natural state, as well as stained and weathered finishes. Our display of solid colors replicate painted surfaces. With the selections offered, you will be able to enjoy the richness of wood or paint at an affordable price. Several other thermofoil colors are available as a special order. Please contact your salesperson for additional colors and patterns.

**We've attempted to reproduce our thermofoil colors as closely as possible. However, slight discrepancies may occur due to printing limitations and variations in wood grain and pattern.**
